\* Not applicable for 'Remote Area' Maintenance sites. Mean Time to Repair (MTTR) post reaching site is 3 Hrs.

\*\*Damage to Hardware or improper functioning of the services due to misuse / abuse by the customer is not covered under both the maintenance plans. Any expense incurred including replacement and repair charges (of the faulty equipment) would be borne by the customer. Cables, connectors, power adaptor, surge protector, antenna reflector and mount, UPS not covered under the scope of maintenance in both SSPM & PSPM. Additional Charges to be paid to the Support Partners for any services rendered to the customer beyond the standard and priority plans' scope

- <sup>(1)</sup> **Speed** : The indicated speeds are only speed Upto our ISP Node and with contention ratios as specified and as per TRAI guideline on Quality of Service for Broadband Service. The speeds listed represent speeds that are attainable after applying acceleration techniques by the terminal. Some data transfers may not be compatible to the acceleration techniques and hence the speed may vary. All published service plans have been designed with a maximum contention ratio of 1:30
- <sup>(2)</sup> **Open Plans**: New subscriber to pay 2 months (one month advance and one month security deposit) with the ISP agreement, free to terminate the service with 1 month notice
- <sup>(3)</sup> **Committed Plans**: Committed to service for the committed period and entire charge for the period is payable in advance. No refund of service charges is applicable, under any circumstances, even on discontinuation, for any reason whatsoever. Excess usage charges shall be debited to the account on occurrence & service shall be disconnected on reaching negative balance, even during the committed period. Any change in Commitment period shall be through new ISP agreement as a formal plan change. During the committed period, only upgrade of plans is allowed. The upgrade period must coincide with the first day of a calendar month. GB usage is on a calendar month basis and no carry forward of usage is allowed from month to month or period to period.
- <sup>(4)</sup> **Flexi Time usage** : Cumulative monthly usage in Flexi Time Plans will be calculated as: Usage during DAY time (8AM - 8PM): @ 100% basis, during EVENING time (8PM – 11PM) @ 50% basis and during NIGHT time (11PM – 8AM) @ 25% basis to arrive at the total usage in the month. Excess usage, if any, shall be charged as per plan rate indicated above.
- <sup>(5)</sup> **Remote Area Maintenance Charges** : Excluded . 'Remote Area' maintenance charges would be applicable to those sites which are remote, viz sites which need more than 3 hours travel time to reach the site. This charge will be levied separately by the partner, on a case to case basis, on mutual agreement between the subscriber and the partner.
- <sup>(6)</sup> **Abuse Control** : This is an optional feature, if selected by Subscriber to minimize abuse, the system will reduce the peak speed of service to 50% level, once usage in a day exceeds 3.75% of the monthly usage limit and again further substantially when usage in the day exceeds 7.5% of the monthly usage limit. The system shall restore to its original state after 10 – 12 hours provided the site is in idle state, ie Either unit off or there is no data usage to and from the site (including spurious traffic from the PCs / LAN) after the site's usage in the day has touched the 7.5% daily usage limit. Abuse control would not be applicable for Night time (11PM – 8AM) usage , for Flexi Time plans only.
- <sup>(7)</sup> **Pay Per Use**: Fixed monthly charges of this plan does not have any default GB/MB volume pack built in and the allowed usage will depend on the credit maintained against the site and disconnection will happen on the site reaching debit balance through usage. Reconnection through top up only.
- <sup>(8)</sup> **Billing Control**: As a practice, the disconnection process runs every night ; it may be possible to use the system beyond permitted limits till disconnection is activated. Excess usage in such cases is payable by the customer. Maximum usage billing per month can be controlled through Forced Disconnection of service, selectable by subscriber, as follows:  
**Special, S**: Disconnection at 100% of Monthly usage limit. Reconnection on first day of the following month only. No top Up option available.  
**OR**  
**Default, D**: Allow usage till adequate credit balance available in customer account - else disconnect at 100% of Maximum monthly usage limit. This option is the default option.
- <sup>(9)</sup> **Regular and Flexi Unlimited Plans** : The system will bring down the speed of the site once the daily fair usage level (cumulative upload and download in a day) is crossed and site will experience considerable drop in speed. The system would reset the site next day morning. Internet service as such is a contention based service and more so in unlimited plans. Any overuse/ abuse by any unlimited plan subscriber in the group shall affect the speed of all other unlimited plan users and hence average speed at any such period may worsen substantially. Subscribers are strongly advised to choose their plans based on their daily usage needs. Regular Unlimited Plans : Daily Fair Usage Level is considered over a 24 hour usage. Flexi Unlimited Plans : The Daily Fair Usage level is divided into two parts – 50% of the total DFUL is during "DAY (8AM – 8PM) time and 50% during "Evening & Night (8PM – 8AM)". The subscriber sites under Flexi Unlimited Plans will be restored to the original state, by the system at 8PM every evening.

**General Terms & Conditions:**

1. Subscriber is fully aware and hereby undertakes that the services being offered by HCIL are for sole use of internet access and applications available through internet non - walled garden services and HCIL in no circumstances, directly or indirectly committing and / or guaranteeing any fitness of purpose that the subscriber may have
2. The Volume transfer (GB Pack and Excess MB) is the total volume transferred from and to the site , ie total upload from the site PLUS total download to the site
3. All billings shall be aligned with Calendar month/ Calendar quarter/ Calendar year basis, as per option chosen by Subscriber. The first bill may get split to bring in this alignment, depending on date of start of service.
4. Any usage beyond maximum monthly usage limit as per plan shall be treated as 'Excess usage' & shall be billed as per Excess usage rate applicable for the plan. Monthly excess usage charges shall be billed during first week of following month for immediate payment.
5. Any excess usage shall automatically reduce customer account balance in the system & such bills must be paid promptly or account topped up to avoid disconnections due to inadequate balance.
6. Service Tax Extra as applicable - 10.3% as per the present GOI norms. Any change to customer's account
7. All the One Time charges and hardware rental to be paid to the partner who shall deliver & install the CPE.
8. The service plans are for Subscriber's own consumption, as an ultimate beneficiary of Internet Services and is not for resale in any form
